Shipboard Basic Safety

Alarms! Please regard all visual and audible alarms.

Never slide down inclined ladder rails. Do not carry loads up or down ladders that obstruct movement or sight (use additional personnel to support the load and a spotter when required).

Don't run.

Watch your step! Be on the lookout for watertight door edges and other obstructions.

Stay away from the edge! It's a long way down.

Watch your head for low hanging objects such as valves, pipes, or brackets.

Use extreme caution when operating or transiting through zone doors.

Read, understand and obey all informational warning and caution signage.
