

PRINT PUBLICATIONS

Our magazines inform and educate Sailors, Marines, and civilians alike.

Experts in the field share experiences and safe practices they've learned so you can be safer. Every quarter, "Approach" brings you aviators' lessons learned and

insightful comments from the high-risk world of Naval Aviation. Twice a year, "MECH" goes into the trenches to find the best testimonials from aviation maintainers. Because so many Sailors and Marines like motorcycling, "RIDE" is a must-read publication, full of

best safety practices and operating tips as well as a look at the newest bikes out there. You can find current and archived issues at <https://safety.navylive.dodlive.mil>.

To request a subscription form, email: NAVSAFECEN_CODE521_MEDIA_COMMS@navy.mil.

ELECTRONIC PUBLICATIONS

LESSONS LEARNED AND SANITIZED SAFETY INVESTIGATION REPORTS (SSIRs)

The Lessons Learned Division actively collects, analyzes, publishes, and archives safety lessons learned information to include trends, analysis, and best practices. Distributed via email, you can subscribe or send a story to: NAVSAFECEN_CODE522_LESSONS_LEARNED@navy.mil

NEWSLETTERS AND SAFETY GRAMS

Quarterly bulletins, distributed via email, highlight lessons learned from maintainers, above and under the sea. Ship's Safety Bulletin (SSB) has safety practices gleaned from the Naval Safety Center's surface assessors. FLASH (Factual Lines About Submarine Hazards) takes submarine safety practices and shares them with

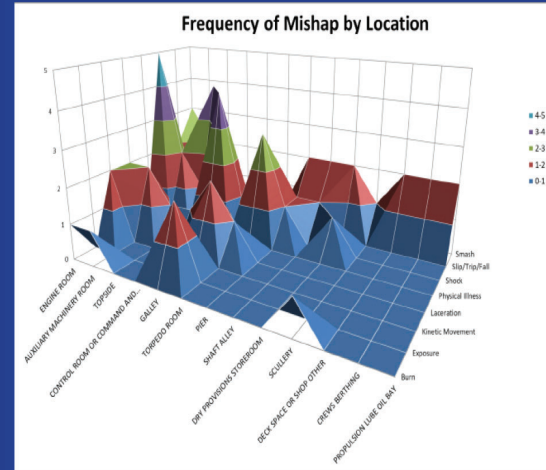

the Fleet. Aviation assessors share their findings in frame-specific aviation Safety Grams. Diving Safety Lines is tailored to the expeditionary diving community. To subscribe, email: NAVSAFECEN_CODE521_MEDIA_COMMS@navy.mil.

KNOWLEDGE MANAGEMENT AND SAFETY PROMOTIONS

USE OUR KNOWLEDGE TO BE SAFER

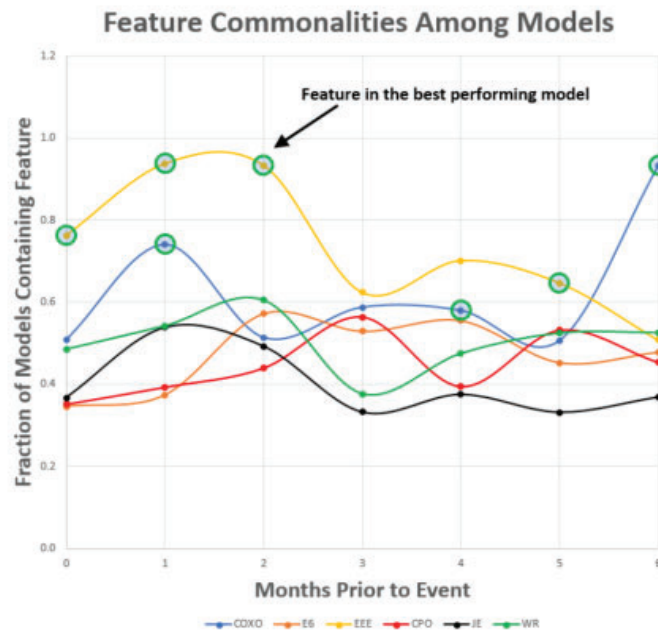

The Knowledge Management and Safety Promotions Directorate (KMSP) provides advanced data analytics, in-depth studies, trend analysis, data visualization, and risk awareness products to the Fleet to promote a culture of excellence across the Navy

KMSP directly contributes to the overall mission of preserving warfighting capability and combat lethality.

KMSP is part of the Naval Safety Center's transformation into a forward-looking organization that prevents mishaps, reaching across all warfare communities and all areas of expertise of the Naval Safety Center.

and Marine Corps. The Operations Research Division conducts studies -- using advanced and predictive data analysis -- and shares its findings Navy and Marine Corp-wide through studies and analysis. Safety Promotions also shares findings as well as lessons from the Fleet in magazines, newsletters, Lessons Learned, and Sanitized Safety Investigation Reports.
