

ARE YOU PREPARED FOR AN EMERGENCY?

Did you know?

Thunderstorms occur all over the planet. When you hear thunder, you are in danger of being struck by lightning, which can strike up to **30 MILES AWAY**

Read the tips below on how you can stay safe during a thunderstorm

Tips For Staying Safe

- Before the storm, trim or cut down large trees that are in danger of falling onto your home
- Have a plan of where you and your family will go if a storm takes a turn for the worse, and include any pets in your plan
- Seek shelter immediately when you hear thunder or if you see lightning
- Don't use devices that are connected to an outlet and avoid using running water
- Keep away from downed power lines and call emergency services
- If swimming or boating, seek safe and secure shelter on land immediately
- Stay up to date with the latest weather forecast
